

**Amendments to the Specification:**

- A. Please replace the paragraph at page 3, lines 1-3, with the following rewritten paragraph:

*Sepals* -Five. There are three normally appendaged sepals. There are two unappendaged sepals. Length - about 1 cm. Width - about 0.5 cm. Shape - triangular, pointed. Base shape - cuneate. Apex shape - aristate. Texture Surface Texture - smooth. Color: Upper side - Green. Green Group 138A. Underside - Green. Green Group 136C.

- B. Please replace the paragraph at page 5, line 6, with the following rewritten paragraph:

*Petiole/Rachis*: Color: Upper side - near Green Group 132B. Length - ~~about 0.5 cm~~ 1 cm. Surface Texture - smooth.

- C. Please insert the following paragraph on page 2, following line 15:

The new rose plant can be distinguished from its parents by its flowers. The seed parent has single flowers, with 5 to 8 petals. The new rose variety has semi-double flowers, with about 16 soft pink petals, which contrast attractively with the bright orange stamens. The pollen parent has medium pink, double flowers. In addition, the pollen parent has a small and compact growth habit. No similar cultivars are known.
